## CARING FOR AND MAINTAINING YOUR CORIAN® QUARTZ

---

### Just Use Water and a Paper Towel

With simple care, this quartz surface will retain its radiant, lustrous appearance for many years. For routine cleaning, simply wipe down your countertop with a damp cloth or paper towel and, if necessary, a small amount of non-bleach, non-abrasive cleanser.

### Clean Up Spills Right Away — Before They Can Dry

Even though the quartz surface resists permanent staining when exposed to liquids (such as wine, vinegar, tea, lemon juice and soda) or fruits and vegetables, you should wipe up food and liquid spills as soon as possible.

## WHAT NOT TO USE

### No Wax or Polish Necessary

Because it is non-porous, this quartz surface does not require sealants or waxes. The quartz keeps its lustrous gloss and ultra-smooth surface without polishing or applying sealant.

### Do Not Use Bleach

Avoid using cleaners that contain bleach. Always follow the cleaner manufacturer's instructions for use and exercise proper care when handling and storing any cleaning products.

### Avoid High-pH Cleaners

Casual exposure to alkaline solutions, such as diluted bleach, will not damage the quartz surface. Highly alkaline (high-pH) cleaners, such as oven cleaners and concentrated bleach, are not recommended.

### Keep Solvents and Powerful Chemicals Off the Counter

Avoid exposing the quartz surface to strong chemicals and solvents, especially paint removers or furniture strippers containing trichlorethane or methylene chloride. Keep nail polish remover, bleach, bluing, permanent markers or inks, and oil soaps away from your quartz countertops.
